

Gaussian processes

Follow the notebook on Gaussian Processes provided in Moodle [you can also get it from last year's repo in github](https://github.com/lucianopaz/statistical_machine_learning/blob/master/notebooks/Gaussian%20processes%20tutorial.ipynb) (https://github.com/lucianopaz/statistical_machine_learning/blob/master/notebooks/Gaussian%20processes%20tutorial.ipynb) (skip the exercises).

You can install `scikit-learn` by running the following command:

```
In [ ]: # install  
!pip install -U scikit-learn
```

```
In [ ]: # check the installed version  
!python -m pip show scikit-learn
```
